

ITycom's Serious Games

are now available
on tablets !

ITycom's Serious Games are now available for tablets

The Serious Games, as well as creations from ITyStudio, are accessible through the ITycom iPad app.

The increase in Mobile Learning

Mobile Learning is by definition the use of mobile devices by students to learn anywhere and at any time. It focuses on mobility, interaction with new technologies, and learning that reflects trends in today's society. It provides so many opportunities and places where students will learn at their own pace and in more informal situations.

The modules at the ITyStore

The application gives access to different training modules. In fact, it is used like a true Serious Games reader.

The tablet makes learning fully mobile (where you want it and when you want it), as well as easy to access and distribute for training large numbers of learners. This new approach facilitates the use of digital tools during classroom training and, therefore, enriches Blended Learning.

Export ITyStudio creations onto tablets

Exporting ITyStudio creations and Serious Games is now possible using the ITycom app available in the App Store and on the web for other Android tablets and others.

The distribution of training is larger (PC and/or tablets) with SCORM 1.2, SCORM 2004, a PC and Mac standalone version, and the web version, Unity for iPad.

Three points new to ITyStudio

Dans le développement de notre logiciel ITyStudio, plusieurs nouveautés sont à découvrir:

- The richest libraries
- New languages : Spanish and Portuguese
- It simplifies getting started in ITyStudio during software discovery

ITycom now uses Unity 3D

Now, ITycom allows authors to export their Serious Games to an iPad. The 3D in real-time also allows the Serious Games to be richer and more interactive. This realistic approach increases the impact of the training and allows total immersion.

Introducing ITycom

ITycom is an expert in Innovative Training Solutions and Talent Management. Based in Paris, Annecy; Geneva and Moscow, we work with national and international actors.

Our solutions are organised into two parts :

-A catalogue of training and educational tools - including e-learning and Serious Games - offering different training modules, as well as the creation of learning tools and of educational devices for assessment.

www.itystore.com

- A software suite includes:

ITyStudio : Author software of multimedia educational content to make Serious Games and 3D simulations.

www.itystudio.com

ITyLearning : LMS for distributing tools and educational content, as well as comprehensive management training and learner outcomes.

www.itylearning.com

ITyRH : Management software for Skills and Talents.
